## SPORTS DAY ON FRIDAY

Everything is in readiness for the celebration tomorrow. The Calgary Girls' Pipe Band will lead the parade from Main Street to the fair grounds at 1 o'clock. All the children should take part in this parade.

Remember, there will be a full line of sports, including soft ball tournament, football tournament, horseshoe tournament, races and athletic events for all ages. Free ice cream for the kiddies.

Admission: Adults 25c. School children free.

All stores in town will close at noon. Everybody is going to the big celebration.

## CROSSFIELD WON THREE FROM CALGARY DODGERS

### Crossfield 2; Calgary 1

The Crossfield baseball team won both games of a double-header from the Calgary Dodgers, Amateur Champions of Alberta, at the local diamond on Sunday.

The first game was a pitchers battle between Scotty Lee and John Gerlitz, with Lee, the long lean local flinger, having the best of the argument. Lee held Calgary to five scattered hits, while Gerlitz was touched for nine safe blows. Both pitchers were given good support. Manager Bills had a great day in the garden, and he and Glen Williams led the attack with two safe blows apiece. Crossfield . . . 1000001-2 9 2  
Calgary . . . 0000001-1 5 2  
Lee and McKinley; Gerlitz and Hides.

Crossfield — D. McFadyen s.s., J. McDowell, 2 b., E. Bills, l.f., G. Williams, 3 b., H. Lee, p.; D. McKinley, c., H. McFadyen, r.f., Doc Evans, c. f., B. Smart, 1b.

### Crossfield 5; Calgary 4

The second game was even more exciting than the first contest. Angus Robertson pitched for Crossfield and had his south-paw slants working nice. The locals had a one run lead, with the score 5 to 4 in the sixth inning, when Lee went in and held the Dodgers scoreless for the remainder of the route. Angus is credited with a win.

Ringing pitching for Calgary had a lot of stuff, but has a tendency to break too many of his curve balls in the groove.

A crowd of around 700 witnessed the twin bill on Sunday, and they witnessed two of the best games played in Western Canada this year.

### Crossfield 3; Calgary 2

Crossfield again defeated the Dodgers at the I. O. O. F. picnic on Tuesday afternoon. Lee was on the mound for Crossfield and turned in his thirteenth win of the season. Lefty Bullard pitched good ball for Calgary and although hit freely, kept the hits scattered.

The score was 2-2 when the locals went to bat in the last of the ninth when they put over the winning run. Bills singled, Lee singled, Bills reaching third on the hit, McKinley laid down a perfect bunt to score Bills with the winning run. It was a nice piece of inside ball, known as the "squeeze" and a fitting climax to a great game that kept the fans on their toes throughout the entire game.

After the first game on Sunday, Bobby Smart turned in his uniform and from now no will devote his time to umpiring. Bob went right in and called them for the second game on Sunday and again on Tuesday. Bob is a good man with an indicator, while "Yank" McFadyen has the makings of a real first sacker.

'Fresh from the Gardens'

### Canadian and World Progress

The above is the main heading of an article in the current issue of Toronto Saturday Night dealing with the present economic situation. The sub-headings to the article state: "Dominion's Rate of Advancement Far Above Other Nations—Favourably Situated To Share Again In Progress."

Because, owing to the present temporary depression in Canada, as throughout the world, but fortunately less acute, this country than elsewhere, there is a tendency on the part of many people to become unduly pessimistic; it is perhaps well to pass on some excerpts from this very illuminating article in the Toronto Saturday Night:

Economic life is in a state of flux. The fortunes of nations are affected by some radical change which may raise or lower their status among the powers. Business men find themselves drawn into the current of new demands and competition, through which the most careful navigation is necessary. Even persons in the most humble circumstances and those who for one reason or another are not engaged in active work cannot fail to notice how their living habits are altered over a period of time.

The most recent period of prosperity probably lends itself to more thorough analysis than any other; for one reason, because from the data available we can more accurately measure the forces employed; we can well determine the degree of economic recovery from the most disastrous conflict in history. Ten years ago the tide of war influenced left a mass of economic disorder. Inflation of credit and currency, severe depression in agriculture, the world market, and industrial conditions, an enormous weight of debt and taxation, and serious labor troubles—these were but a few of the difficulties which faced world business.

The economic forces of the world were finally mobilized along the broad front ever occupied by an army of workers. The ensuing advance was not uniform the world over; the United States, Canada, France and Argentina swept ahead of other countries, but progress was made almost everywhere on the globe, and in this period of intense economic activity world production reached a record level.

An analysis made by the Canadian Bank of Commerce bears out this statement. An interesting sidelight in that analysis is a comparison between the progress of Canada and that of the world as a whole. It should not be taken for granted that Canadian production of basic commodities exceeded that of every other country, but it is a proven fact that the rate of increase in Canadian production exceeded that of the world by a wide margin in many cases.

This advance of Canada was so rapid as to place her among that small group of nations which enjoys a highly diversified economic organization, and one which has a broad field of opportunity for the application of agricultural and industrial science and the direction of business into the safest channels.

Consider a few figures. Between 1925 and 1928, world wheat production increased 13 per cent, but in that same period Canadian wheat production increased 35 per cent. Coarse grain production increased in Canada 21 per cent, as compared with a world increase of only 5 per cent. Coal production—world increase, 5 per cent; Canada, 33 per cent. Oil production—world increase, 24 per cent; Canada, 88 per cent. Lead production—world increase, 11 per cent; Canada 32 per cent. Copper production—world increase, 18 per cent; Canada, 81 per cent. Tin iron production—world increase, 1 per cent; Canada, 10 per cent. Steel production—world increase, 7 per cent; Canada, 63 per cent. Automobile production—world increase, 7 per cent; Canada, 66 per cent. Paper production—world increase 9 per cent; Canada, 31 per cent. Aluminum production—world increase 15 per cent; Canada, 125 per cent. Artificial silk—world increase, 17 per cent; Canada, 217 per cent. Woolen goods—world increase, 17 per cent; Canada, 45 per cent. Foreign trade (value), world increase, 30 per cent; Canada, 26 per cent.

The foregoing cannot, of course, be accepted as a complete registration of the world's economic activity, nor should it be regarded as a fair picture of unalloyed prosperity; perhaps it goes without saying that the world has not yet reached that ideal state where the work of all its people can be accurately recorded, and while this work is to be in such perfect form that none shall starve, there will still be some suffering.

In the current year we see the aftermath of some misdirected economic effort, and of the greatest speculative boom in history. But, whatever the actual damage is today, the world's needs must eventually go on increasing, and its present economic condition can only be fully appreciated with the present period of unsettlement is over and the stage is again set for prosperity. As for Canada, her imposing record of progress achieved in the brief space of the last four or five years gives but a hint of her potential power, and the position attained by the development of her natural wealth, she can take when world progress is resumed.

#### Heats and Sound Insulation

Diatomite is a light fluffy material composed of the minute siliceous skeletons of diatoms, and is used in industry as an insulator against heat and sound, for filtering, and as an admixture in concrete and plasters. The Dominion has a large number of diatomite deposits in British Columbia, Ontario and the Maritimes.

#### And Sixty Days

There is a story about a man who lay down among the victims of a train wreck that he might claim damages, and now Glasgow reports a man who was hurt in a fight and was taken to the hospital along with those hurt in a tramway accident. He got £10 damages from the company and 60 days in jail when the fraud was discovered.

**Most Costly Lightning Stroke**  
The costliest lightning stroke known was that which struck the U.S. Naval Ammunition Depot at Lake Denmark, N.J., in 1926, resulting in the loss of 51 lives and damage amounting to \$83,000,000.

What a man gets out of a job depends a great deal on what he puts into it.

#### Tribute To Dr. Eckener

##### People Take Visits Of Graf Zeppelin As Master Of Course

A writer in the New York Evening World says: "It is interesting, as showing what has happened with regard to this 'air-mindedness' that is so often spoken about, that the Graf Zeppelin, fighting the worst weather that it has ever encountered, caused the smallest stir at its arrival here that it ever caused. People now take it for granted that it will arrive in safety, just as they take it for granted that the 'Europe' will arrive and depart safely and on schedule, or the 'Bremen' or the 'Berengaria.' She has become, in the minds of the American people, a sort of aerial liner, a little more exciting, no doubt, than an ocean liner, but in pretty much the same class. Dr. Eckener, then, if he is a reflective man, will realize that his matter-of-fact acceptance of his presence was perhaps the highest tribute to him and to his ship that could be paid. People no longer wonder about the Graf Zeppelin, but realize that regular air transport over the Atlantic is now a reality."

Some credit to Mr. Hoover as a prophet, it seems to us, is due in this connection too. It will be recalled that quite casually, before any of us had ever seen the Graf Zeppelin, he said that regular airship travel across the Atlantic would come in a few months. Well, here it is.

#### PALE FACES JADED NERVES

##### Due To Weak, Watery Blood

Anæmia—impoverished blood—comes so stealthily that it is often well advanced before recognized. Fatigue and discomfort, the earliest symptoms of the disease, are often taken seriously. Soon the face becomes pale; the nerves jaded; the heart palpitates violently after the slightest exertion; you realize it you are in a terrible plight.

At such times, enriching and purifying the blood is required. "Pills" will build up the nerve cells and correct the run-down condition. Concerning them Miss Margaret Tuckey, of the Ontario Medical Association, completed her talk.

Each patient will palpitate on the least exertion. Nothing I ate agreed with me. I started taking Dr. Williams' Pills and by the time I had taken several boxes I was ready for anything; I had gained in weight and every distressing symptom had left.

You can get these Pills from any dealer in medicine or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

#### New Baby Auto

##### Automobile Being Made To Sell At \$200 In United States

It is stated that General Motors have under construction a small four-cylinder automobile along the lines of the English Austin, which will retail in the United States at around \$200. Patterns are being made at Detroit for the new radical design, which is expected to greatly extend the ownership range of the automobile, and to boost business, which has fallen off seriously in the higher-priced models. Details of the new motor car are being jealously guarded.

**Persian Balm creates lovely complexion. Velvety smooth. Cools and relieves the skin. Makes it delightfully soft-textured. Astringent. Soothes the skin. Relieves pain. Absorbed by the tissues, imparting that elusive charm so distinctive of the delicate woman. Persian Balm protects the skin. Preserves and enhances the loveliest complexion. Every discriminating woman should use this silvery lotion. It is unrivaled as a flawless aid to beauty.**

#### British Columbia Head Lice

Head lice is moving from the Armstrong fields, and it is said that the acreage will provide shipments totalling between 30 and 40 cars; the movement being greater this year than last.

There is probably no other modern development of astronomy as the application of photography.

If insects can't think, how does a fly know when you reach for a sweet instead of a sweet?

#### Falling Hair

Minard's before it's too late. It checks falling hair and stimulates new growth as well. Apply gently to scalp four times a week.

**MINARD'S  
"KING OF PAIN"  
LINIMENT**

#### For a Unified India

##### New Era Is Visualized In Second Volume Of Simon Report

India, with its teeming millions, its history stretching back into dim antiquity, even a story of division and strife, its original independence was realized in the second volume of the Simon report as ultimately one strong unified nation occupying an important place among the British commonwealths of nations.

Although the process may take many years, the report foresees India eventually welded into one great confederacy under a federal government to which not only British India, with the exception of Burma, but also the individual Indian states under native rulers would adhere.

In the meantime the report recommends the building of a federal government of the eight governors' provinces. The remaining governor's province, Burma, would be entirely separate from India.

The provincial governments would be the schools in which the training of the Indians in self-government would be continued. A constitutional framework would be set up for the provinces by a revised India Act, which would be broad enough to permit of adjustments to meet the varied requirements of the different provinces and permit of the unobstructed or uninterrupted growth to complete responsible government.

The government of the province would be the chief minister, in every province that every minister should be a member of the legislature, members from the legislature would be eligible for any of the portfolios in the cabinet and there would be joint cabinet responsibility. At present in the provinces there is a division of responsibility, and restricted authority.

The British army must remain in India. The well-being of India and the well-being of the Empire require its presence there for many years to come, much as it is constituted to day.

#### Cano Won Daring

##### Race With Death

**Amid Treacherous Ice Floes Transported Sick Northern To Churchill!**

Hardships of a daring two-day voyage in an open canoe through floating blocks of ice in Hudson Bay to bring H. F. Ford, Hudson's Bay Company factor at Monias, 80 miles north of Churchill, to the latter place for medical aid, were described at the Pas by the company officials.

On May 20 he fell victim to a mysterious malady. For three weeks he had labored for life with only the rudimentary medical assistance afforded by such a settlement.

As he was rapidly weakening it was decided to bring him to Churchill. An open freight canoe was fitted with a sail, loaded with scant provisions and prepared for departure.

Kenneth Carter and two Eskimos volunteered to take the sick man through the hazardous course to the new northern seaport.

The party set out early in the morning of Thursday, June 5. Paddles combined with a small sail forced the small boat through the heavy seas that raged during the middle of the night. Twice the party were nearly swamped. Ice blocks proved a danger during the voyage.

Ford weakened perceptibly during the long hours under the open sky. Although the days were warm there was a sudden drop in temperature during the evening.

On Saturday morning, June 7, the four arrived at Churchill, and Ford was given treatment in the Hudson's Bay Company post there. On Monday, the 9th, he was brought on the Muskeg Limited to the Pas. He arrived there Wednesday morning, June 11, and left in the evening for the hospital in Winnipeg.

**Antisins Can Be Cured.** Its suffering is as needless as it is terrible to endure. After its many years of relief of the most stubborn cases no sufferer doubts the perfect success of Dr. J. D. Minard's Antisins Remedy. Comfort of body and peace of mind return with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

#### At the Final Exam

People go about Venice in Gorgonzolas.

A polygon is a man who has many wives.

A brunette is a young bear.

Ambiguity means having two wives living at the same time.

A figure of speech is a way of talking or writing by which you say what you don't mean and yet mean what you do.

A cliche is a line which meets its other end without ending.

The Normans introduced the Fru-  
gal system.

#### Reduction in Postage

##### Rates On Letters and Parcels Outside Canada Are Less

Reduced postal rates on Canadian mail destined to foreign countries with the exception of the British Empire, France and North and South America, became effective July 1, according to announcement by Postmaster-General Department. The changes resulted from the World Postal Congress held in London, England, last year, and will affect many countries of the world.

Under the new rates, letters will be carried for one cent each the ounce and three cents for each subsequent ounce or fraction. The postage rate will be three cents. The rate on samples will be two cents for a packet not exceeding four ounces in weight and one cent for every additional two ounces.

Commercial papers will be carried for five cents for a packet not exceeding 10 ounces in weight and one cent for every two ounces thereafter. The rate on samples will be two cents for a packet not exceeding four ounces in weight and one cent for every additional two ounces.

International reply coupons will be sold at seven cents each and the redemption value will be of five cents in postage stamps for each coupon.

All these rates apply only to parcels or letters destined to points outside Canada.

#### OPEN SORES

HEAL IN QUICKEST TIME KNOWN  
TO MAN  
Never failed to heal. Then "Horseshoe" healed  
them in a few days. These sores never before  
healed so quickly. No ointment, like magic. All drugs.

#### Coal Movement Arranged

Everything Ready For Shipments  
From Alberta and Saskatchewan  
Into Manitoba

All administrative arrangements in connection with the movement of Alberta and Saskatchewan coal into the Manitoba market under the recently granted subvention to aid in the coaling of imported fuel, are now completed, it was stated by Frank G. Neate, secretary of the Dominion Fuel Board, Ottawa. Mr. Neate was in conference, at Winnipeg, with operators from Alberta and Saskatchewan and with distribution and railway officials.

"The machinery is all set up to handle the administrative work, the co-operation of the railways has been secured and the operators and distributors understand what is required of them," said Mr. Neate. "With the weapon now in their hands with which to combat the importation of foreign coal, it now is up to the coal people to use it."

#### English Language Spreading

American Books Have Extensive Market In Foreign Countries

The wide and growing prevalence of the English language is attested by the fact that countries to which our tongue is that of a foreigner take high rank among the purchasers of books published in the United States. The Department of Commerce supplies the information that American books have an extensive market in foreign countries. While naturally the United Kingdom and Canada supply the largest number of readers in the countries that stand third in the purchase of books made in the United States is China. Latin America and the Philippines take large numbers. That the third best customer for books printed in the English language is China shows how widely the English language is spreading, and with it, of course, Anglo-Saxon culture.

**A Prime Dressing For Wounds.**  
Dr. Thomas Williams, of the Canadian Arctic, has invented a dressing which is kept for use in cauterizing wounds and cuts sustained by the workmen. Far better to keep on hand a bottle of Dr. Thomas' Electric Oil, than to have the workman do not scar the skin or burn the flesh.

After 62 years of waiting the congregation of St. Michael and All Angels' Church, Helensburgh, Scotland, have just decided to complete the erection of the uncompleted church tower.

**Use Minard's for Rheumatism.**

**Cleanliness Assured.**  
By dropping a coin equivalent to five cents in the slot of a new machine in Berlin, Germany, one may get a sufficient amount of water to wash the face and hands. Added to this are a package of powdered soap and a paper towel.

**Keep Foods  
Deliciously Fresh**

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-San Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh, delicious! Para-San keeps them from stalting. Get Para-San in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Full" Packs in sheet form.

**Appleford Paper Products**  
HAMILTON, ONT.

# Nearly One Billion Dollars Invested In Electric Power Stations Throughout Canada

Nearly one billion dollars was invested in central electric power stations in Canada at the end of 1923, or \$956,919,668 to be exact, according to an official report issued by the Canadian Government Bureau of Statistics. This is twice the amount of the investment in this industry in 1920 and over \$80,000,000 more than the total in 1921. An indication of the importance taking place in electric power developments throughout Canada and the amount of capital being invested, is given by the statement in the report that the total of \$956,919,668 was a larger capital expenditure than the railways of Canada reported for 1922.

The rapid growth of the pulp and paper industry in the Dominion in recent years has been an important factor in the growth of central electric power stations. In the year under review, the electric motors in the pulp and paper mills of Canada had a rating of 359,017 horse-power or 36 per cent. of the total rating of all such motors in manufacturing industries and mines, an increase of 320 per cent.

Central electric power stations in Canada in 1923 produced 16,337,894,000 kilowatt hours, an increase of 12 per cent. over the output in 1922, and 177 per cent. compared with the 1920 output.

The number of customers who purchased power from the central electric power stations was 1,464,005, an increase of 2,637 over 1922. Only 1.6 per cent. of the electric power produced in the central stations is from fuel plants. Water power is among the principal of Canada's natural resources, and is available 20 million horse-power at ordinary times. The stream flow throughout the year rising to over 33 millions for at least six months of the year. To date only about 5,500,000 horse-power have been harnessed.

Compared with other countries, Canada stands second only to the United States in turbine horse-power installation, and second in turbine horse-power installation per 1,000 of population. Norway alone being higher. On a per capita basis Canada has nearly five times the installation of the United States.

There is now scarcely a village in Canada that does not enjoy the advantages of electric power. In British Columbia, for each 100 of the population, 16 families are using electricity for lighting their homes; for all Canada the average is 14.5. This means, reckoning 4.63 persons to a household, that over two-thirds of the homes in Canada, rural and urban included, are using electricity for lighting and other domestic purposes.

## Using British Typewriters

**Four New Offices Of Mounted Police, At Regina**

The British preference has made its show in the equipment of the R.C.M.P. offices in Regina. There are now four high grade typewriters made in Great Britain, used in the R.C.M.P. offices.

It is said by those that use the machines that they compare in price with the cheaper United States machines, and in performance with the best machines manufactured in the United States. The typewriters have straight built frames, and though slightly, a slight variation to the standard machine manufactured in the United States, have the standard keyboard.

## In No Danger

Sandy McPherson was travelling to Glasgow, and on the way, he felt thirsty, so he took out a bottle and drew the cork. Just as he was about to take a taste, a fellow passenger in clerical garb addressed him:

"Excuse me, sir, but I am 65 years of age, and I have never tasted a drop of whisky."

"Dinner worry yerself," said Sandy, "you're no gaun ta start no."

"Let's go for supper to the 'Three Spoons'! The other day I found a collar stink in the soup."

"?????"

"Perhaps we'll find a neck-tie to-day!"—Pages Gaies, Yverdon.

W. N. U. 1844

## May Be Made Useful

### Possible That Goldenrod Farming May Become Popular

Goldenrod is a beautiful flower and a persistent weed. It grows all over the country and so comes as near as anything to being our national flower. Modern medical admen say it is not goldenrod but ragweed which causes hay fever. Henry Ford's experimental goldenrod farm in Georgia succeeds in commercializing Edison's rubber, we may see goldenrod farming becoming as widespread as wheat farming is today. This is not impossible, but very difficult. Yes, the farmer grows wheat once a weed and has been made into a crop by somebody's discovery that it is useful to humanity.

## Co-Operative Associations

### Organizations In Canada Now Reach Total Of 926

Co-operative associations in Canada number 926, according to the latest federal figures, with a total membership of 512,835, which includes the grain growers of the Prairies, the largest co-operative body in Canada, dairy farmers and fruit and vegetable growers of the eastern provinces. Apart from these there are some 26 co-operative distribution societies and 100 general co-operative unions. There is also a number of consumers' co-operative societies outside the union of which the majority are in the western provinces.

## Winnipeg Newspaper Union

(By Annabelle Werthington).

3282

A stunning outfit for deb and the little sub-deb who follow closely in the wake of the big sister. Pattern No. 3282 is printed tan silk that would appeal to any smart miss in its attractive dusty-pink tones. The wide belt and hipline bows are plain faille ribbon in the deepest shade of the print.

The long-waisted bodice is caught with plain left side buttons which makes the right side quite deep emphasizing its diagonal line. The gathered tier of skirt are decidedly youthful.

This little model comes in sizes 12, 14, 16, 18 and 20 years. It is dainty for afternoon or chit-chat in crimson-red shade.

Wool chintz, printed dimly, printed batiste, pastel flat washable crepe silk, printed lawn and printed wool.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Patterns Department.

## WORLD HAPPENINGS BRIEFLY TOLD

On June 24, the King and Queen received the delegates to the Imperial Press Conference, in the throne room at Buckingham Palace.

British Columbia expects to benefit from the new Australian tariff just introduced in the Commonwealth House, extending a British preference to lumber.

Mr. Bennett Scott, the song composer whose "Take me back to dear old Blighty" was sung by soldiers all over the world, died at his home at Lorraine Mansions, London, England.

Mr. and Mrs. Joe V. Illenevure, of Detroit, were burned to death when their airplane fell at the municipal airport, in Toledo, Ohio, and burst into flames.

President Hoover has approved transfer of the obsolete submarine P-12 from the navy to the U.S. shipping board which will charter the craft to Sir Hubert Wilkins for North Polar explorations.

F. E. Beattie, aged 50, an accountant in the Bank of Hong Kong and Shanghai, at Shanghai, disappeared from the "Empress of Russia." It was reported on the steamer's arrival at Vancouver. He was a passenger enroute to Scotland with his wife.

Alfred Mays, retiring Canadian minister to the United States, who delivered the annual commencement address at the University of Michigan, Ann Arbor, was awarded an honorary degree of Doctor of Laws.

L. R. McGregor, new Australian trade commissioner to Canada, arrived at Victoria recently from Sydney with his wife and two children. He is particularly anxious to introduce Australian wines to Canada.

### Switzerland Is Prosperous

#### Has Population Of Over 4,000,000 And People Are Good Workers

Switzerland, which has an area of only 19,850 square miles, has now a population of roundly 4,000,000 to which it has risen from 3,300,000 in 1930. Much of the country is still mountainous and unproductive. Agriculture is almost a waste of native raw materials and while she has 600,000 persons engaged in productive industry. In fact, it is not too much to say that if all the world worked as well and as effectively as Switzerland, it would be a happier place. Switzerland is never troubled by war or rumors of war.

### Canada's Military Force

#### Consists Of 401 Officers and 1,067 Non-Commissioned Officers

Canada's permanent military force at the present time comprises 3,943 all ranks of whom 401 are officers and 1,067 non-commissioned officers. At headquarters in Ottawa there are nine naval officers, forty-nine military officers and thirty-one air officers. There are also at headquarters a total of 104 other ranks.

Four hundred and forty-three civilians are employed of whom 400 are permanent.

The cost of administering the headquarters totals \$1,425,311 annually.

### Exhibit For Poultry Congress

A consignment of specially selected live poultry amounting to eighty-five birds, inspected and passed by Professor Wood, of Winnipeg, has been sent to Ottawa, where it will be linked up with the Canadian contingent of a thousand birds for the world's poultry congress. These birds include some of the choicest specimens of poultry to be found in the whole Dominion.

HOW THE RICH FARMER EQUIPPED HIMSELF AS A PROTECTION FROM MOTOR-ACCIDENTS IN THE CITY.—Ludwig Sachse, Leipzig.

W. N. U. 1244

## Many Accidents Caused By Neglected Cars

Carelessness Allows Defects To Develop In Mechanical Parts

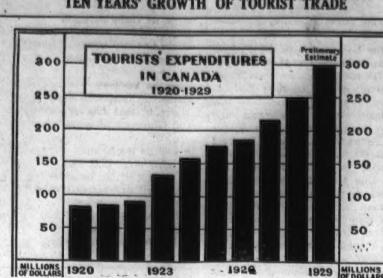

Automobile owners in the United States who neglected to keep their cars in good condition were responsible for five thousand of the lives lost in traffic accidents during the last calendar year. This estimate is made by the framers of the report recently submitted to the National Conference on Street and Highway Safety at Washington, by its committee on the maintenance of motor vehicles. To learn that fully fifteen percent of the traffic fatalities recorded in 1929, are actually traceable to lack of proper care of cars is an enlightening statistic. The studies of the conference indicate that the cost of maintaining cars in good condition is negligible. The studies of the committee have convinced its members that stricter official inspection of all automobiles is urgently needed.

Essentially this report charges that because of improper maintenance defects are allowed to develop in vital mechanical parts of a car; brakes and steering gear are allowed to become dangerously worn or drop out of adjustment; horns, windshield wipers, rear lights and headlights uncorrected become ineffective.

A steady increase in driving speeds in the last few years has served only to increase the hazards created by the negligence of those who drive and permit them to be operated when they are unfit to be driven on public highways.

Such a sum of money is almost staggering, and it is difficult to find comparisons enabling us to realize its immensity. Perhaps the most startling comparison that could be made is to place this sum alongside the enormous outlays that Canada was called upon to make in connection with the Great War. According

## TEN YEARS' GROWTH OF TOURIST TRADE

The rise in the value of Canada's tourist trade during the last ten years has been little short of phenomenal. Estimates of the expenditures made in the Dominion by tourists from other countries run back as far as 1920, and it will be found that during the years 1920-29, inclusive, tourists from abroad are estimated to have spent in Canada a total of roundly \$1,682,000,000.

Such a sum of money is almost staggering, and it is difficult to find comparisons enabling us to realize its immensity. Perhaps the most

startling comparison that could be made is to place this sum alongside the enormous outlays that Canada was called upon to make in connection with the Great War. According

to the Federal Public Accounts the total expenditure made by the Dominion Government under the heading "War and Demobilization" is placed at roundly \$1,685,000,000.

Thus the expenditures made in Canada by tourists from other countries will be the largest ever made. They are estimated at an amount which falls only a few thousand dollars short of equalling Canada's immense outlays for war and demobilization purposes. It is not to be wondered at that the highest financial authorities in Canada have recently made it a special point to direct public attention to the growth and possibilities of this comparatively youthful recruit to the ranks of the Dominion's major economic interests.

### Bacon Contest

#### Summer Bacon Litter Competition To Be Held In Saskatchewan

The Saskatchewan Livestock Branch, with the co-operation of the Dominion Live Stock Branch, is fostering a summer bacon litter competition as a stimulus and a first rate benefit to the swine industry of Saskatchewan. According to J. G. Robertson, Livestock Stock Commissioner for Saskatchewan, the competition will be divided into four parts for the purpose of this contest, over which the prize money will be equally distributed. Among the conditions of entry it may be noted that litters must be farrowed between April 1st and July 1st, and may be out of a grade or a purebred sow, but must be sired by a registered bacon type boar, and at least nine pigs must be raised to marketing age.

### Pulsating Stars

#### Theory Advanced That Certain Stars Do Not Rotate

A theory that certain stars do not rotate, is presented to the American Association for the Advancement of Science by Dr. Robert Gunn, of the National Research Laboratory. These pulsating stars are those which pulsate, that is, which expand and contract. Some of the pulsating stars have the habit of enlarging their diameters millions of miles. They beat like vast fairy hearts.

One class of pulsating stars, the Cepheid variables, are the "light-houses" of the sky, that is, they enable astronomers to calculate the vast distances of space. Dr. Gunn's theory comes from study of magnetic fields about stars, especially those about the pulsating stars.

### Working For Grain Show

C. Tie, secretary of the British Columbia publicity committee of the World's Grain Show, reported that a large district committee representing the counties of Courtenay on Vancouver Island, is working successfully in securing exhibitors. These exhibits will cover a number of classes and will do credit, no doubt, to this district when the time for competition arrives.

The arctic tern nests 11,000 miles from where it spends its winters.

The simplest element known to man is the hydrogen atom.

## SUNDAY SCHOOL LESSON

JULY 6

### ABRAHAM, A PIONEER OF FAITH

Golden Text: "By faith Abraham, when he was called, obeyed to go out unto a place which he was to receive for an inheritance; and he went out, not knowing whither he went." Hebrews 11:8.

Lesson: Genesis 12:1-5; 13:1-12; 17:1-8; 18:22-33; Hebrews 11:8-10.

Devotional Reading: Psalm 23.

### Explanations and Comments

The Call That Came To Abraham, Genesis 12:1-3. Some inward suggestion of divine origin caused God to speak to Abraham, who is called Abram in the early chapters of Genesis. That he was called by God to leave his country and his home and his father's house (cumulative expressions which show how much Abram had to lose in obeying the command) is the fact that God would state in His word that God is definitely stated in verse five as the land of Canaan. The word of God is the word of God, and the outward say any more than does the oriental of the present day. "God has spoken to me" is a common expression in a boy's speech. Under the simple statement "Jehovah said," there are probably hidden questions of qualification and meditation.

The question of His call to Abram in all probability passes through the preliminary stages of surmise and doubt and mental conflict. But one observes that God was quick to respond and quick to answer. "God responded quickly and without delay," Marcus Dods. "He was sure that God had a plan for his life, and acted upon it without delay."

God's call to separation was a necessary condition of blessing. "I will make of thee a great nation, and I will bless thee, and make thy name great"; this is the great thought that runs through the whole book of Genesis. "God can impress us with his will, and we can understand it as we understand the will of God; He can inspire us with such sublime and sublime hopes as can only be understood by us." —James Denby.

"And be thou a blessing." Abraham's Great Adventure. Of faith, Genesis 12:1-5. —With Sarah and Lot, his nephew, and all his slaves and dependents, and also his flocks and herds, Abraham journeyed to Canaan. He had no friends and about which he knew little. "They went forth into the land of Canaan and into the land of Canaan they came." It was here, even a hundred years later, a long and dangerous journey. "They started, they arrived there in all. Well, that is what happened to people who are as capable as Abraham and as decisive in their faith."

Dr. Jowett calls belief the acceptance of God's word while faith is the taking of the voyage. Abraham had belief and faith.

"So I go on not knowing. I would not if I might; I would rather walk with God in the dark."

Than walk alone in the light: "I'd rather go with him by faith Than walk alone by sight."

David J. Burrell.

### Trade With Russia

#### Are On The Increase

"Soviet Russia may be said to be the only country, outside of Germany, in Central Europe which imports direct the bulk of its requirements of Canadian products," writes L. D. Wilgress, Canadian Trade Commissioner in Hamburg, in the "Commercial Intelligence Journal." "Other countries in the German-speaking zone, Czechoslovakia, Austria and Poland, consume important quantities of Canadian goods, but these are usually consigned in the first instance to Hamburg and for this reason appear in the Canadian trade returns among the exports to Germany. Canada's exports to Soviet Russia in 1929 increased by \$1,137,068."

### Of Course Not

A Grammar School student was set a question in an examination paper—"If twenty men reap a field in eight hours, how long will it take fifteen men to reap the same field?" The student thought long and carefully before writing the answer, and when handed in his paper this is what the examiner read—"The field having been reaped by twenty men, could not be reaped by the fifteen!"

A German scientist has devised a spectacle lens said to correct the defect of vision known as color-blindness.

### Recipes For This Week

(By Betty Barclay)

#### LEMON MARSHMALLOW COOKIES

1/2 cup shortening.  
1/2 cups sugar.  
6 tablespoons lemon juice.  
Grated rind 1 lemon.  
3 cups flour.  
1 teaspoon baking powder.  
1/4 teaspoon soda.  
1/4 teaspoon salt.  
Marshmallows.

Cream shortening; add sugar and cream again. Beat in eggs; add lemon juice and rind. Fold in sifted dry ingredients. Roll out on slightly floured board and cut out. Bake in a moderately hot oven (400 degrees) for 10 minutes; remove from oven, place half a marshmallow in the center of each and return to oven to brown.

#### CARROTS AND CHEESE

Mince twelve medium-sized carrots. Steam until tender. Put into a baking dish. Sprinkle liberally with cheese and a little salt and pepper. Beat three eggs and strain into a pint of milk that has been put on the stove to heat. Let the mixture thicken; then pour over the carrots and cheese. Add more cheese for a top dressing. Put the baking dish in a pan of water and place in the oven to brown.

#### Sunspots and Rabbits

The number of sunspots received by the Hudson's Bay Company from year to year since about 1910, shows marked periodic variation. According to an investigation made at the Dominion Observatory, Ottawa, the number of rabbit pelts was, on the average, three times greater one year before the minimum of sunspots than at the maximum.

Bremen, Germany, was visited by 228,000 tourists last year.

Medical inspection of schools is just being put into force in Ireland.

## Desert Will Become Garden

### Young Engineer Raising River Jordan To Water Desert Land

A miracle is recorded in the Bible of the Jordan dividing at the word of the prophet. The miracle is being repeated now at the word of an engineer. Sceptics or atheists must be won to what they can see.

Now, in the Jordan, is rising the Jordan bodily and throwing it just where he wants it to fall, like the giant of fairy tales who lifts up mountains and hurl them at the heads of his enemies. And in a few years the oldest of countries will be electrified and the most dreary of deserts will become a green garden.

On the left are the forbidding and barren hills of Transjordan. Pedestrians are a rarity on the road to Jericho. After a few miles the sound is heard of a pick striking stone. There is a loud baying of donkeys and the puff of a small steam engine. And out of the desert the traveller finds a long line of concrete, the Rutenberg milestones.

Workers stop their work to gaze at the European stranger.

"It is all very simple," says an enthusiastic young engineer, who is helping to turn a hideous desert into gardens of loveliness. "All you have to do is know how to do it and then see that it is done. For miles around there is land rich in chemical fertilizer. The Dead Sea has been deposited here for centuries. But there is no water and so the land is dead, deserted and desolate. 'But if we raise the Jordan thirty feet we shall be able to turn the desert into a paradise. It is quite simple to do that. That concrete wall that goes down there is the first step. A little further along you will find another. It is believed that the service Rutenberg is doing Palestine by watering the desert places is greater than by supplying it with electricity."

### A Romantic Province

#### Colorful Pages Of Pioneer History In The West

The oldest of the Prairie provinces has had a romantic history. It gave birth to the romance of the West with its Red River carts, an association which colors the pages of pioneer history in the West. From what was Fort Garry to what is today Winnipeg, is in itself a monument of a story replete with adventure and achievement. It is the story of early beginnings ending in great accomplishments, with the torch lit by the first pioneers now illuminating a great and prosperous province. July 15 is the anniversary of great pride to the people of Manitoba who have been doing serving as an incentive to further achievement, with the spirit and zeal of the early pioneers carried on to meet the needs of the modern day—Lethbridge Herald.

### Wood Produced From Cotton

#### New Material Has Been Perfected By Man In England

Synthetic wood produced from compressed and hardened cotton material has been perfected by a Clerkenwell, England, man. It is said to be indistinguishable from mahogany, oak, or any other wood, and can be used in making furniture and all kinds of house fixtures. Its cost is much less than ordinary wood and its life will be as long, the inventor says. It may be moulded into any warp. It is expected to reduce the cost of houses as well as of furniture.

#### Manufacture Of Rayon

In the manufacture of each pound of rayon by the viscose process, there are used one and a half pounds of wood pulp, two pounds of caustic soda, one and a fifth pounds of carbon bisulfide, and one and a half pounds of sulphuric acid.

The Central Railroad of Peru crosses the Andes at one point at 15,865 feet above sea level.

In Czechoslovakia there are fourteen women in Parliament, ten deputies and four senators.

"Were you driving for the first time?"

"No—the last." Hummel, Ham-

In the north woods at Metagama, North Ontario, where M. U. Bates runs his camp, moose are unusually plentiful this spring. Mr. Bates was visiting the camp the other day and saw a large moose standing and an infant moose asleep in one of the bushes. He lifted them out but they came back to the veranda and, finding a sunny spot, had another nap. The moose were quite tame and are here being posed for a photograph. The snapshots were taken within a mile of the Canadian Pacific Railway tracks near Metagama.

## SOUTHERN CROSS LANDS SAFELY AT NEW YORK

Roosevelt Field, New York.—Completing his flight from Ireland which was interrupted by a landing at Harbor Grace, Newfoundland, Capt. Charles Kingsford-Smith brought his famous monoplane "Southern Cross" to a safe landing before a wildly enthusiastic crowd.

He first appeared out of the northern sky, a speck attended by a dozen smaller specks, shortly before 6 o'clock, but passed high above to circle above Manhattan.

The Southern Cross, after a 1,100 miles from Harbor Grace, Newfoundland, he treated the crowd awaiting to acclaimed him, to a spectacular exhibition of vertical flying before bringing his ship to a perfect three-point landing directly before the throngs massed behind a high wire fence.

The four men of the "Southern Cross," Captain J. Patrick Saul, Evert Van Dyk, and J. W. Stannage, were neither physically nor nervously weary.

Deafness bothered them a bit, from the long endured roaring of the three ancient Wright whirring motors, but they were nimble and quicksilver when they clambered down of the big blue-hulled ship into the hands of the mob.

It was a reception that might have reduced lesser men to damp, frightened exhaustion, for the arrangements, made so carefully and so constantly revised all day, broke down utterly and shamefully.

It had been planned that after the United States health and customs inspectors had cleared them, the Nassau County reception committee, the New York City reception committee, and finally, Sir Ronald Lumsay, the British ambassador and his diplomatic party, should formally greet the flyers.

But instead the police times failed to hold, the gentlemen of the reception committee got hustled about with no regard for their eminence, Sir Ronald was rudely poked in the stomach by an excited copper, the coat was nearly torn from the back of Henry Allen, the Australian high commissioner to the United States.

It was the worst hurly-burly that has ever occurred on Long Island flying field where there have been many similar skirmishes between the cops and the citizens.

The flyers, as a result, were nearly trampled under foot as they stepped down into the noisy cordial crowd and it was fifteen minutes before the 175 county police under Chief Abraham Shidmore, were brought into sufficient discipline to cease shoving members of the reception committee and get the flyers to the operations office.

There at last, when the last politician's hand had been shaken and the last reception committee man photographed, the rapidly waiting Kingsford-Smith was permitted to receive a cablegram from his fiance, Miss Mabel Powell, of Melbourne, to greet a couple of his oldest friends in this country, and to tell the story of his last great flight to the newspapermen.

It was his last great flight, he stressed. When he sets the "Southern Cross" down at Oakland, California, he will have completed his aerial circumnavigation of the world which commenced two years and one month ago.

And when that is done he will marry in September and give himself to the more humdrum but vastly more profitable business of directing a flying transport service in Australia.

Harbor Grace, Nfld.—Baffled by fog thick as soup and more dangerous than buffeting winds, the Southern Cross, off the air, paused having flown the 2,190 miles from Port Marnock on the Irish coast, settled out of the morning mists here at 6 a.m., E.S.T.

They had four gallons of gasoline left when they landed, after having flown about four hours in the darkness and impenetrability of fog. At one time, the Southern Cross was reported past Cape Race, on the southeastern tip of this promontory of the continent. They actually flew several hundred miles farther than the air-line distance from Ireland to Newfoundland.

W. N. U. 1844

## Thirty Lives Lost In Dynamite Blast

Lightning Strikes Boat In St. Lawrence River and Sets Off Explosives

Brockville.—When a bolt of lightning struck their boat and utterly demolished it, 30 men were hurried to their deaths in the waters of the St. Lawrence River near here. Only 12 of a crew of 42 are alive, and of those, 10 are seriously injured in a more or less serious condition.

The boat was the "J. F. King," a drill boat owned by J. P. Porter and Son, of St. Catharines, Ont. It was engaged on a Federal Government contract to blast out the ship channel off this river port. Lying off Cockburn Island, one of the eastern fringes of the Thousand Island group, the boat was engaged in drilling a shoal when a thunderstorm blew up from the west.

There was a deafening report outside for miles around. A blinding sheet of lightning reached down from the heavens. The boat was struck by the electricity which ran down into packed dynamite in the shoal. Literally, the boat was blown to atoms.

Men had no chance to escape. They were caught like rats in a trap. Those who were not killed instantly by the force of the explosion were blown out into the water in such a dazed state that they sank before help could reach them.

The morning's discussion, J. B. F. Livesey, general manager of the Canadian Press, a delegate, submitted a tentative scheme for the creation of a British Empire Press Association. The scheme suggests the establishment of national co-operative news service, similar to the Canadian Press, with a central office in London, through which the national units could exchange Empire news. The association, suggested Mr. Livesey, should be "mutual and co-operative from crown to base, girding the world with the spirit of a service owned and controlled by the newspapers of the British Empire."

C. F. Crandall, of the British United Press, Montreal, pressed the need for individuality in news service. Hon. Theodore Fink, chairman of the Australian section, approved of the principle of the news interchange but was not permitted to proceed at once with consideration of a definite scheme. K. C. Roy, of India, doubted if the creation of a co-operative news service, such as that suggested by Mr. Livesey, would be possible. In

Victor Sifton, The Leader-Post, Regina; J. W. Dafoe, Manitoba Free Press; Winnipeg, and W. Rupert Davies, the Whig-Standard, Kingston, Ont., emphasized the advantages of co-operative service as exemplified by the Canadian Press.

The Canadian Press despatches, said Mr. Sifton, were accurate and impartial. Mr. Dafoe observed that Canada had every possible diversity of views; co-operative news gathering had been tested in Canada and found satisfactory. It did not destroy individuality as newspaper men have it in their own special correspondents to other services. But every political question had its hard core of actual fact and it was this core of fact which the Canadian Press presented.

"It is an enormous relief to me in my office," said the noted Winnipeg editor, "to know that there is the Canadian Press to give me the essential facts on every question. If I wish to embroider them that is my privilege."

Mr. Davies said that as a result of the formation of the Canadian Press the smaller Canadian newspapers

would have its own special correspondents to other services. But every political question had its hard core of actual fact and it was this core of fact which the Canadian Press presented.

He will visit Ottawa and Washington before sailing from New York to Europe.

## New Zealand Requires Canadian Engineer

Services Of Outstanding Man Needed To Repair Power Plant

Wellington, New Zealand.—Services of an outstanding Canadian engineer are required in New Zealand. The government has appointed its trade commissioner in Canada asking that he secure such a man. The "job" is that of effecting repairs to the recently completed Arapuni power plant. Canada's great strides in the science of building and maintaining such power plants is largely responsible for the fact that a Canadian is wanted.

Record Set For Women

Detroit.—What was declared to be an international speed record for women was set here when Amelia Earhart, flying over a measured 64-mile course at Grosse Ile airport, averaged 174.9 miles an hour. Miss Earhart flew a standard Lockheed Vega plane.

Manufacturing More Butter

Winnipeg, Man.—Manufacture of creamery butter in Manitoba continues to increase rapidly, according to a report from the Department of Agriculture. The make for May, it is stated, was 20% per cent. greater than of May, 1929.

Austrian sound-film interests are seeking government support.

## PLANS APPROVED FOR AN EMPIRE NEWS SERVICE

London, Eng.—By an almost unanimous vote the Imperial Press conference placed its seal of approval on the resolution which was proposed by E. Norman Smith, of the Ottawa Journal, that "this conference approves the principle of mutual and co-operative interchange of cable news between the component parts of the Empire."

Subsequently B. C. Nicholas, of the Victoria Times, moved a further resolution that the communications committee be authorized to investigate and report upon the advisability of co-operative news distribution for the Empire. The purpose of this resolution, Mr. Nicholas explained briefly, was to translate the conference decision into practical effect. There was considerable opposition to the Nicholas resolution, however, and Mr. Nicholas did not press it.

During the morning's discussion, J. B. F. Livesey, general manager of the Canadian Press, a delegate, submitted a tentative scheme for the creation of a British Empire Press Association. The scheme suggests the establishment of national co-operative news service, similar to the Canadian Press, with a central office in London, through which the national units could exchange Empire news. The association, suggested Mr. Livesey, should be "mutual and co-operative from crown to base, girding the world with the spirit of a service owned and controlled by the newspapers of the British Empire."

C. F. Crandall, of the British United Press, Montreal, pressed the need for individuality in news service. Hon. Theodore Fink, chairman of the Australian section, approved of the principle of the news interchange but was not permitted to proceed at once with consideration of a definite scheme.

K. C. Roy, of India, doubted if the creation of a co-operative news service, such as that suggested by Mr. Livesey, would be possible. In

Victor Sifton, The Leader-Post, Regina; J. W. Dafoe, Manitoba Free Press; Winnipeg, and W. Rupert Davies, the Whig-Standard, Kingston, Ont., emphasized the advantages of co-operative service as exemplified by the Canadian Press.

The Canadian Press despatches, said Mr. Sifton, were accurate and impartial. Mr. Dafoe observed that Canada had every possible diversity of views; co-operative news gathering had been tested in Canada and found satisfactory. It did not destroy individuality as newspaper men have it in their own special correspondents to other services. But every political question had its hard core of actual fact and it was this core of fact which the Canadian Press presented.

"It is an enormous relief to me in my office," said the noted Winnipeg editor, "to know that there is the Canadian Press to give me the essential facts on every question. If I wish to embroider them that is my privilege."

Mr. Davies said that as a result of the formation of the Canadian Press the smaller Canadian newspapers

## WAR VETERANS' ALLOWANCE

Daniel Leahy, totally disabled war veteran, who will be first to get war veterans' allowance when new act goes into force September 1.

were asked to give their readers a first-class service.

C. L. List, of New Zealand, pointed out the advantages secured by New Zealand by the establishment of a similar system for all parts of the Empire would be all to the good. Alan Powers, Manitoba, and G. A. L. Green, South Africa, both doubted the immediate expedience of an Empire co-operative service. R. J. King, South Africa, supported the idea.

In another discussion, Lord Farnham observed that the Canadian case was unsatisfactory, but suggested postponement of the resolution until the next Imperial Press Conference. J. E. Woods, managing director of the Calgary Herald, then replied that the Canadian delegation was a unit in support of Mr. Norman Smith's resolution approving the principle of co-operative interchange of news. He urged that the matter should not be postponed.

The conference then voted on the question and the Canadian resolution passed with very few dissenters.

## Traffic Problems Discussed

Canadian Good Roads Association Holds Convention in Toronto

Toronto.—Realization of a coast to coast highway across Canada, uniformity of traffic laws and signs in the provinces, elimination of level railway crossings and regulation of aeroplanes were the topics of discussion at a conference of delegates from all provinces which was held here under the auspices of the Canadian Good Roads Association.

Among the delegates were Hon. Frank Oliver, advisory officer to the Dominion Railway Board, and Hon. W. R. Clubb, Manitoba Minister of Public Works.

## Twenty-Seven Planes Burn

Fire Caused By Explosion in Chicago Hangar

Chicago, Ill.—Two hangars and 27 aeroplanes, of them tri-motor passenger planes, were destroyed by fire at the municipal airport. The loss was estimated at more than two million dollars.

The hangars destroyed were those of the Universal Air Lines Inc., and the Grey Goose Air Lines, the latter under lease to the Stout Air Lines. The fire followed an explosion of undetermined cause in the Universal hangar.

Washington—Political and official Washington is watching the slumping prices of grain and cotton closely these days.

Two Democratic senators from Texas and Oklahoma states which produce both crops, called the senate's attention to the record lows recently, connecting the price drops with the new tariff bill.

The Oklahoman, Senator Thomas, told a small proposal for dealing with the world market which fixes most American farm prices. He introduced a resolution to authorize the president to call an international conference to solve economic barriers.

The Oklahoman, Senator Thomas,

told a small proposal for dealing with the world market which fixes most American farm prices. He introduced a resolution to authorize the president to call an international conference to solve economic barriers.

At the Farm Board, Chairman Legge stuck close to his position that the time has not yet come to act, because the farmers have not put their 1930 crops on the market yet. That time is perilously close, however, and in the southwest marketing of grain has already begun.

Arrangements made during the past year, however, put the board in a position to act quickly when the time comes, and funds already on hand of the board's first quarter million appropriation can be supplemented by money which Legge is able to borrow, if needed, from private banks at the prevailing low money rates.

The board intends to market 300,000,000 bushels of grain of the new crop and to lend money to enable farmers to hold their grain if the price at harvest time is too low. The board believes that money is available in the market, subsequently the \$250,000,000 authorized but not yet appropriated may not be needed.

The government's expected deficit next year is also a factor to be considered in seeking farm appropriations.

The board has no comment to make on the telegraphed request of Governor Reed, of Kansas, for immediate action to bolster the price of grain.

## Federal Aid For Highways

Canadian Good Roads Association Will Urge This Matter

Toronto.—A bill to aid four main highways, provincial as well as inter-provincial, will be urged on the Dominion Government by the executive of the Canadian Good Roads Association. It was decided here at a conference between that body and representatives of the Ontario, Quebec, Manitoba, Saskatchewan and New Brunswick governments, the railways, the Dominion Railway Board and other bodies.

The executive will also draw up a proposed schedule of uniform traffic regulations which is being prepared by all provinces will do. This code will cover a speed limit, lighting and bridge equipment, and registration fees.

A plan for federal aid for highways in Northern Ontario was made by Hon. William Finlayson, minister for lands and forests for Ontario. Mr. Finlayson declared that these four provinces would be a valuable link in a national chain, but that the areas through which they extended was very sparsely populated at present, and that unless the Dominion contributed towards the cost, the whole burden would fall on Old Ontario.

## Britain's Naval Program

Program For 1930 Includes Three Six-Inch Gun Cruisers

London, England.—Rt. Hon. A. V. Alexander, first lord of the admiralty, told the House of Commons that supplementary estimates in the government's 1930 naval construction program would be presented shortly for three 6-inch gun cruisers, nine destroyers, three submarines, four sloops and one net-layer and targeting vessel. They would cost about £9,000,000.

The first lord said orders for laying down these vessels would not be given until the last quarter of this financial year, and that only a small sum would be required to be spent on the hulls themselves.

"I would emphasize," remarked Mr. Alexander, "that these ships are required in replacement of others which have passed the age limit and to enable the royal navy to carry out its current duties in time of peace and that the program has no relation to those of other powers."

February the prairie provinces met and decided to guarantee, backed by their resources; the loans made to the Pool by banks in order to meet the initial payment. This was done in order to prevent the Pool being forced to unload what on depressed market in order to realize collateral sufficient to protect the margin required by the banks on loans.

Report On Manitoba Grain Fields Encouraging

Crop Summary Issued by Department of Agriculture

Winnipeg, Man.—Grain fields in Manitoba look very well "by virtue of satisfactory growth," during the last few weeks and despite slow May growth and cold spring weather, according to a crop summary issued by the Manitoba Department of Agriculture. Early-sown wheat is reported in the shot-blade and fall rye has been headed two weeks or more.

In most places, moisture requirements have been met, though slough-water is not plentiful due to dry soil on year ago. Soil drifts have been partly well integrated, though it was quite prevalent a short time ago in central Manitoba. The few hailstorms recorded in the province have done considerable local damage.

Cut-worm damage on the whole has been slight, it is stated, and the season for their activity will soon be over. Hay prospects are fair to good and tame-grass and clover acreage is below average, the growth is fair. Animals have been doing well the past month.

## General Election For Britain

Ramsay MacDonald States Labor Party May Go To Country In The Fall

London, England.—The possibility that a general election might be necessary before fall was expressed yesterday by Minister J. Ramsay MacDonald, at a meeting of the Labor Party here.

The Prime Minister made the statement in explaining his action in commons earlier in the day, when he announced the government was dropping the education bill and the consumers' council bill for the balance of the present session.

MacDonald said that in view of the likelihood of a general election before autumn, it was not desirable to face the contest "with the decks littered with lumber."

## Amendment Given First Reading

London, Eng.—Recent agreements between the Dominion Government and the provinces of Manitoba, Saskatchewan, Alberta and British Columbia, regarding the natural resources of the respective provinces, has had an echo in the House of Lords when first reading was given to an amendment to the British North America Act, designed to give effect to the agreement.

## SAY BANKS NOT PRESSING WHEAT POOL FOR CASH

Winnipeg.—Reports that Canadian lending banks were pressing the wheat pool and the prairie governments for cash to cover a portion of the 1929-30 grain crop were characterized as "nonsense," by officials concerned.

A London newspaper is stated to have published a report that the provinces might be asked to put up part of their guarantee and that a grave financial crisis was involved.

Referring to the newspaper's reported estimate that a demand of 10 cents per bushel would involve \$1,000,000,000, Pool officials commented that the statement was "so foolish that it does not require an answer."

S. L. Cork, chairman of the committee of the Pool's lending bank, remarked that he did not know of any such situation. Recently Premier John Bracken, of Manitoba, stated that no additional step by the provinces was necessary.

At the present time cash wheat is selling well under \$1.00, which was the amount of the Pool's initial payment to members. Two days ago, initial payments on remakes of the 1929 crop yet to be delivered by Pool farmers were cut to 85 cents per bushel.

It is known that the amount of grain in Pool farmers' hands is small; the Pool has turned the amount "insignificant." The initial payment cut had the added effect of barring non-pool farmers who might have joined up merely to cash in on a hold-over when they failed to sell when the prices were above the dollar-mark.

The first lord said orders for laying down these vessels would not be given until the last quarter of this financial year, and that only a small sum would be required to be spent on the hulls themselves.

"I would emphasize," remarked Mr. Alexander, "that these ships are required in replacement of others which have passed the age limit and to enable the royal navy to carry out its current duties in time of peace and that the program has no relation to those of other powers."

Report On Manitoba Grain Fields Encouraging

Crop Summary Issued by Department of Agriculture

Winnipeg, Man.—Grain fields in Manitoba look very well "by virtue of satisfactory growth," during the last few weeks and despite slow May growth and cold spring weather, according to a crop summary issued by the Manitoba Department of Agriculture. Early-sown wheat is reported in the shot-blade and fall rye has been headed two weeks or more.

In most places, moisture requirements have been met, though slough-water is not plentiful due to dry soil on year ago. Soil drifts have been partly well integrated, though it was quite prevalent a short time ago in central Manitoba. The few hailstorms recorded in the province have done considerable local damage.

Cut-worm damage on the whole has been slight, it is stated, and the season for their activity will soon be over. Hay prospects are fair to good and tame-grass and clover acreage is below average, the growth is fair. Animals have been doing well the past month.

## White Bread Is Endorsed

Is a Wholesome Nutritious Food, Say U.S. Experts

Hard on the heels of the statement made by E. W. Beatty, president of the Canadian Pacific Railway, that the greatest help the United States could do Canada would be to consume all of the wheat it raises, comes the report of the United States Department of Agriculture that white bread is a wholesome nutritious food, and should be eaten as part of a balanced diet.

During the past five years the United States Department of Agriculture has found that there has grown up in the United States a distinct fear of white bread, a sentiment created largely by propagandists of wheat substitutes. So the amount of white bread consumed has been gradually diminishing.

But five nationally known authorities on nutrition assert that white and whole wheat bread should be eaten as part of a balanced diet.

Experts and farmers looking to the business side of the picture, see dire disaster facing wheat farmers if anti-wheat bread propagandists have their way. The diminishing demand for white bread spurs further demoralization of the American wheat farmer.

The American people today consume three bushels of wheat out of every four raised in the United States. It's this extra bushel that must be sold abroad that is causing all the trouble. If this extra bushel could in some way be consumed in the United States, the world problem would clear up readily and Americans could sleep soundly.

But is white bread good? The leaders who say "Yes" are Dr. R. Adams Dutcher, Pennsylvania State College; Dr. E. V. McCollum, Johns Hopkins University; Dr. Lafayette B. Mendel, Yale University; Dr. H. C. Sherman, Columbia University of Wisconsin.

The United States government officials, too, led by Dr. A. F. Woods, director of scientific work, agrees with these bread authorities.

Ultimately the United States will consume all the wheat that it raises. But now—now is the time to help the farmer solve the wheat problem. For it is a big one, and still un-solved.

### Desert Canyon Flowers

Satin Star Is Exquisite In Texture and Tinting

Within the canyons of the desert mountains are found species of annuals which, because they must have a greater share of moisture, do not venture out on the level desert wastes. Of these, says Nature Magazine, the desert satin star is easily the queen. Of the blazing star family, it upholds the traditions of that group for distinctive form and attractive qualities. Its satiny flowers are not equalled in all the desert flora in exquisite texture and dainty tinting. Painted Canyon and other gorges in the mountains north of Mecca, California, are its favorite dwelling places.

### An Energetic Octogenarian

That breezy Irishman Sir Thomas Lipton became an octogenarian the other day, and while so many of his generation are preparing to bid farewell to mundane affairs at that stage, his boundless energy is being concentrated on another game attempt to lift the America Cup with Shamrock V. King Edward, who always had a discerning eye for "the goods," had a great regard for him and honored him with his friendship for many years.

One of New York's power stations consumes a train load of coal every day—about 30 car loads.

If they just keep on trying, they'll invent a breakfast food that is absolutely tasteless.

Every third person in Copenhagen, the capital of Denmark, rides a bicycle.

**A DRAMA OF PASSION**

"Ah, you've just come at the right moment. I've just killed my wife, and I hadn't the courage to commit suicide."—Moustique, Charleroi.

W. N. U. 1844

### Rapid Changes On Farm

Industry Has Been Revolutionized By Use Of Electrical Appliances

According to the Detroit News, an electric thrill is quickening agriculture. There are 160,000 miles of electric lines now in service furnishing current for farm uses. These rural extensions have occurred so rapidly that the number of electricity users added to the rural group during the past eight years is about equal to the total number of buyers of current at the end of the first quarter century of the history of the electric light and power industry in this country.

This rush order for more "juice" means more jobs, more providing more jobs in the cities. The introduction of electricity at first means only better lights. But with the new light turned on, all sorts of electrical helpers begin to offer themselves.

There are few processes on the farm that can not be quickened by the use of electricity. In Sweden, where rural electrification has reached remarkable development, plows are drawn across the fields by powerful motor tractors taking their current from trolley lines.

But the greatest use of electricity on the farm is as chores boy. It pumps water, turns the feed grinder and ensilage cutter, hoists the hay, hatches chicks and prepares the meal. Even the cow separator requires the milk and operates the churn.

The demand prompted by these new rural wires will be for machines and more machines. The pessimist should get a thrill out of such contemplation.

### Editors Are Human

No More Anxious Than Average Citizen To Stir Up Trouble

When a doubtful situation arises in a town, it is quite the fashion to remark that "the paper ought to say something about that." The average citizen feels quite certain he could run a newspaper better than the editor does, and if he were publisher of that sheet he'd show 'em you bet. As a matter of fact, if he has horse sense, he would do just as the editor does—put the soft pedal on family rows, church scandals, scandals not involving principals, and such matters of minor importance as will adjust themselves with the passing of time. He might critic, ought to, expect a newspaper to advance or attack any proposition which he himself hasn't the courage to support or assuage over his own signature.

The editor is willing—even eager—to push any project in the public interest. But he is not willing to pull chestnuts out of the fire for individuals or for minorities.

### When the Bolshevik Scored

No Come-Back For Either Doctor Or Architect

We all must agree that when it comes to the question of occupation or profession, the character of either should be of far greater importance than consideration of priority.

A doctor, an architect and a Bolshevik were discussing the priority of their occupations.

The doctor said: "When Adam's side was opened and a rib removed to make woman there was a surgical operation—medicine was the oldest profession."

The architect said: "Yes, but when the earth was made out of chaos, there was the building process, the use of materials according to plan. The architect is therefore the oldest."

The Bolshevik smiled and said: "But who supplied the chaos?"

### As She Understood It

Little Mary was on a visit to her grandparents and the old-fashioned grandfather clock in the hall was a source of wonderment to her. While she was standing before it her grandmother said to her from the next room: "Is the clock running, dear?"

"No, ma'am," promptly replied Mary. "It's just standing still and wagging its tail."

### Friee Too High

A Scot climbing the Alps had fallen into a deep crevasse.

"Bide a wee bittie, Jock, I'll soon ha'e ye coot o' that," called his companion. "I'm awa' to ye village for a rope."

Two hours later he returned.

"Are're ye still there, Jock?"

"Aye," came the faint response.

"It's nae use, ma mammie; they're askin' \$3.75 for the rope."

According to a recent analysis the average bank in Japan needs \$4,800,000.

For one invention alone—a new electric light—Edison made notes extending to 40,000 pages.

### Price Of A Clean Farm

Eternal Vigilance Necessary In Order To Control Weed Menace

Things are never so bad but what they might be worse and, while in the case of the weed problem, on some farms this might be a matter for doubt, it is nevertheless true that there is always growing room for a few more if they are allowed to grow.

From the common ordinary routines of rotation, hoeding, another crops and so forth, there are a few factors which are somewhat neglected in common control practice and which are of prime importance to the individual as means of control.

In the first place a keen weather eye should be kept for new appearances. All of our common weeds were introduced at some time or other, and at some time or other in their career on any one farm they could have been attacked with comparative ease. A case out of ten gets its first start in a common weed farm because there is only a small amount of it and, since it is an unknown quantity, it is lightly regarded.

Another case to the same point is the checking up on the possible sources of new weeds. The sowing of clean seed has been pretty thoroughly stressed and at any rate it is too late now to do anything about it, other than to make resolutions for this fall and next year, but there is another source of weed seeds which can still be checked up on and that is the threshing machine. That the grain separator has been a serious offender in past years cannot be denied, and everybody should be aware that it is the threshing machine which is responsible for the spread of weeds over the land.

Child welfare is indeed a fitting subject for a special feature in a world wide Red Cross program of improvement of health, mitigation of suffering, and prevention of disease.

### No Wealth But Life

Study Of Matters Pertaining To Good Health Is Of Paramount Importance

Around the great exhibit of the Department of Health of Great Britain, at the recent World Exhibition of 1924, one read the inscription: "There is no wealth but life." The meaning was well illustrated by the many marvelous inventions which were devised by the skill of man to preserve this wealth that the race might be rich.

Unfortunately it does not always follow that health is purchasable; else many a millionaire would be the possessor of that strength of body and mind which the rich often find elusive. Like the rain which falls upon the just and the unjust, the divine gifts which govern the quality of health a man enjoys, are as impartial as the sunshine.

One of the greatest of tragedies of man is that of rash and hasty and that health has somehow shod one's grasp. In the multitudes of possessions one has failed to possess one's soul in patience, and the result is sleepless nights and restless days. Or again, there is the irony of being able to provide in abundance all the bounties of the table, and yet to lack the one thing needful—a good digestion.

Part of the peace-time programme of the Canadian Red Cross is to make a study of health conditions and by various means to induce the study of healthy living among the people. That health can be published has been shown to be a most accomplished fact.

That the Albert Red Cross broadcasts over C.I.C.A., the Edmonton Journal. A considerable correspondence ensues and the follow-up of these listeners reveals the fact that there is a keen desire on the part of young married people to understand at first hand the profound mysteries of birth and parenthood.

Child welfare is indeed a fitting subject for a special feature in a world wide Red Cross program of improvement of health, mitigation of suffering, and prevention of disease.

### As Old As Aeronautics

Early Experiments With Parachutes While Tragics Were Not Without Humor

Unquestionably the parachute, nearly in its present shape, is as old as aeronautics. There is supposed to be a picture of one in Venice dating from 1617, and there is a narrative of a French ambassador to Siam in the 17th century to the effect that a mountebank at the royal court climbed to the top of a tall bamboo and jumped off with two umbrellas to support him. Very likely this is true.

Shortly after the Montgolfier ascents, the French aeronaut Blanchard seems to have made the first parachute experiment in connection with a balloon, but instead of trusting himself to the apparatus he attached his dog.

Finally because the parachute had been designed for the weight of a man and was thus much too large for the dog, instead of dropping when released, it went up considerably higher than the balloon, then at about 6,500 feet. After a time it came down near the balloon and the dog got a chance to bark at Blanchard. At least, that's the yarn that was told. Finally Blanchard reached the ground by a gradual descent of his balloon and a little later the dog landed unharmed.

This successful experiment doubtless greatly stimulated the inventors for presently various forms of parachutes were suggested, some of which were actually constructed, and which were used in aerial maneuvres.

These promptly folded up when released and resulted in the death of its inventor. After this it appears the designers returned to the original umbrella form.

The first successful drop from a balloon at any considerable height appears to be that of the Frenchman Gariner who staged a performance at Paris, in 1882. Gariner cut himself loose at 1,200 feet and luckily managed to land safe and sound.

One Of The Indispensables

Nothing Will Take The Place Of A Newspaper

We never miss the paper till the well runs dry and the same applies to the daily newspaper. A valuable object lesson was given to readers in England on Good Friday this year.

Good Friday and the day after Christians are two days in the year when no newspapers are published in England. On Good Friday the weather was very inclement in the old country and those who remained home by their own free-will were glad to be there. Something, however, was missing. The setting and comfort were not complete. There were no daily newspapers to read.

Although nearly everyone has a radio set, that did not fit the particular void for, to the amazement and chagrin of those listening in by the firesides, there was "absolutely no news."

Instead of the usual bulletin of happenings, a musical interlude was offered.

Next morning's papers carried the usual news items of interest and showed irrefutably that there was news. We must admit that the daily paper is indispensable. Being without the daily sheet for only one week-day is convincing enough.

An Unexpected Answer

The philanthropic lady was visiting a school. To test the brightness of a group of rather poor pupils she questioned:

"Children, which is the greatest of all virtues?"

No one answered.

"Think a little, what is it I am doing when I give up time and pleasure to come and talk with you for your own good?"

A grumpy fist went up.

"Well, what am I doing, little boy?"

"Please, ma'am, buttin' in!" was the reply.

Could Be Better

A little boy had got into the habit of saying "darn" of which his mother naturally did not approve.

"Darn," she said to the boy. "here is sixpence; it is yours if you will promise not to say 'darn' again."

"All right, mother," he said, as he took the money. "I promise."

As he was lovingly fingering the money, a hopeful look came into his eyes, and he said:

"Say, mother, I know a word that's worth a shilling."

World's Largest Wire Kops

What is believed to be the largest wire rope in the world is to be used at a dockyard in Hong Kong for hauling huge vessels up the shipways. The rope contains 884 wires, is 1,656 feet long, weighs 30 tons and has a breaking strain of 900 tons.

### Graveyard Of The Atlantic

Nova Scotia Coast Has Always Figured In The News Regarding Missing Ships

Sable Island, that "graveyard of the Atlantic," off the Nova Scotia coast, has always figured in the news. An item reproduced by the Halifax Chronicle from an old newspaper of June, 1826, tells how British Government sent an allowance of 400 pounds sterling for the support of the lighthouse on the island, provided a similar sum was contributed by the legislative of Nova Scotia. The grant was regarded "as a fresh instance, if indeed any were wanted, of that liberality which distinguished the gifts of our maternal government."

"By the last packet, advices have been received from the British Government allowing 400 pounds sterling per annum towards the support of the establishment on the Island of Sable. A like sum was contributed by the legislature of the province."

"The grant we consider amply sufficient for the purpose, and as a fresh instance, if indeed any were wanted, of that liberality which distinguishes the gifts of our maternal government."

"While we would be remiss if we cannot see on what principle of justice Canada and New Brunswick can refuse to furnish a certain quota of the expenditure for this establishment. They reap the benefit as well as we do. For example, there have been five vessels cast away upon the island this season—two of these, the ship 'Empress of Asia'—which sailed from St. John, and the last ship, the 'Nassau,' was bound for Quebec. It is, in fact, an establishment the expenses of which ought to be borne by the commercial interests connected with the whole continent of North America; and we are much inclined to hope that the correspondence which has been opened by His Excellency with the neighboring provinces on this subject, in sequence of an address by the assembly during the late session, will end by making such an arrangement as will be due to our claims of justice."

### Was Used Centuries Ago

Germany and Italy Used Guillotine Long Before France

Who invented the guillotine seems to be troubling the French since there has been agitation for the discontinuance of beheading by machine.

Dr. Joseph Guillotin, an authority on anatomy, member of the assembly during the revolution, demanded "equality before the executioner" and the guillotine was adopted.

It was not the doctor who proposed it, but because he suggested a standard form of execution and because of the similarity of name, the guillotine has been supposed by most people to have been the doctor's invention.

Old engravings left by the Baron de Rothschild, however, show much the same machine was used centuries ago. German artists in 1500 drew a picture of a machine quite like the modern instrument, and Italian illustrations illustrating a story of Roman days, showed a similar device in which a heavy sword, falling in a groove, did the beheading.

Filling Large Order

Lumber mills in Vancouver are working night and day on the production of 400,000 giant red cedar shingles to cover the 151,000 square feet of roof on the Log Lodge Hotel at Lucerne-in-Quebec. The order, placed by the Lucerne-in-Quebec Community Association, Limited, with Alexander Murray Limited, of Montreal, is said to be the largest single purchase of hand split shingles in the history of the lumber industry.

Wallpaper is said to date back to the year 1481.

Lloyd George's father was once a tin podder.

"You've ordered two new dres-

s. Don't you know that I am broke?"

"Of course I do, but the dress-

maker doesn't." — Waite Jakob,

Berlin.

### Proud to be "Returning Canadian"

"A returning Canadian! I little thought that I would ever come back to Canada with such an interesting label," said Mrs. Victor Whitehead, when she arrived at Quebec on the Canadian Pacific liner "Duchess of Bedford."

Mrs. Doris Jack, daughter of Richard Jack, the well-known British author, had just returned from her honeymoon in Australia and New Zealand. In addition to amazement at the notion of taking an active part in the Royal Canadian Air Force, she loves riding and hopes to pay a further visit to the Rockies. "I'm a Trail-Rider," she proudly announced, "and I hope to add another silver button to my present one when I have earned it!"

According to a recent analysis the average bank in Japan needs \$4,800,000.

### CHAPTER XVIII.—Continued.

The doctor chuckled, glanced shrewdly at his companion, and replied: "I don't imagine that those rides were a real sacrifice to my a-sa-stant!"

"If they were," retorted Charmian with a dimple, "he disgraced the fact with proper gallantry; but I'm none the less grateful to him. It's a long walk to District Four when the mercury hovers around zero, Doctor; and Grandma worries."

"I wish you didn't have to leave her, Charmian. The days must seem long now that winter has set in."

"I fear they seem a great deal longer than she admits," replied the girl. "Grandma's so patient and uncomplaining. But I can't give up the school, Doctor, even with the welcome bonus money coming in each week. I know we will do what we can to the old house, the way we do. I might, in the name of common sense, be willing to part with it and break my heart, but I can't break Grandma's; and no other home would seem her own."

The old man was silent for a moment, and then said: "George K. tells me the house is really yours, Charmian."

"It is. I thought you knew that. Grandma deduced it to me a year ago. She got the idea that it might save trouble for me after she goes; and I let her do it because it made her happy."

They rode half a mile in friendly silence. It was beginning to rain, the big flakes drifting down lazily and settling on the windshield.

"I've been thinking," said the doctor at last. "I can't help worrying about you, child, because I know you see this chapter coming on hand, and to advise you you must need advice. An idea came to me in the night, an idea that might not suggest itself to you, and I'm telling you now so that if the time comes when you must part with the old homestead, you could consider it. It's this: If you sell the place, don't part with your great-grandfather's little office. You could live there comfortably, you and Grandma. With a kitchen and bathroom added at the back it would make a cozy enough home; and it would be home, in a way, to both of

## YOUNG WIFE STRENGTHENED

After Taking Lydia E. Pinkham's Vegetable Compound.

Bancroft, Ontario—"When I first took Lydia E. Pinkham's Vegetable Compound I was very weak and feeble, about a year and my strength was leaving me as though I had been in a bad condition. I was only 19 and it was my first child. My mother told me I needed something to steady my nerves and a good tonic to take the Vegetable Compound. I am so thankful I did because it strengthened me and I am now not only well and healthy but have a strong little healthy boy."—Mrs. J. B. STALKER, Bancroft, Ontario.

W. N. U. 1844

you. Don't forget it, child, if I'm not here to remind you."

"But you will be! I won't admit anything can ever take you from us, Doctor Howe—we need you so. But I'll remember your suggestion. It's a good one, only—what would your young M.D. do for an office?"

"That point," answered the doctor, "will take care of itself."

Another moment of stillness followed; then he said, briskly, as if making a decision. "I think I'll confide in you, Charmian. You know, of course, that I haven't saved much money. I've had nothing to save for; and I've done my work for the work's sake, and the love I have for my loyal patients. I've kept my house in repair, paid my bills, and, providing there was money for that, I haven't hounded folks if they paid slowly, or even if they didn't pay at all. So you see, child, I'm no John D!"

"I see," said the girl, wondering where this confidence was leading.

"I wonder how much John Carter has told you about his life," he said the old man unexpectedly.

"Very little," replied Charmian, still curious.

"Possibly then, you don't know that as a boy he had almost everything he desired. His people were wealthy, and John and his sister might easily have been spoiled. They went to exclusive schools, and later mingled with what society calls the best, meaning, I suppose, the most stylish. John had always wanted to be a doctor, but he wasn't strong and his father, knowing it to be a hard life, objected. The boy persisted, however, and after graduating from Harvard went into Medical School.

In his second year there, his father suddenly came to him and announced a worry. Though no one had expressed it, things had been going badly with his business. There was enough left to pay his creditors and save a few of the family heirlooms, nothing more. Two weeks later John's mother died in her sleep."

"Oh, that poor boy!" broke in Charmian with compassion.

"Poor boy, indeed," went on the doctor, "for he loved both parents dearly. The sister, fortunately, had married well. John made his home with her, and went on studying—earning his own way—working too hard, and risking his not too robust health. That was his reason, my dear, for taking a 'country practice.' He needs fresh air, and to get away from permanent invitations that would mean late hours. There are enough late hours in the life of the average doctor without adding to them in sickness."

"He will certainly escape society in Wickfield!" assured Charmian.

"What is what you want, and what brings me back to my starting point?" the old man continued. "The boy is doing well. The Wickfield people like and respect him. He understands them, and takes hold as I'd hoped he would. So, though of course he doesn't guess it, when my time comes, Charmian, he will inherit what little I have to leave: a roof over his head; an office that folks used to come to; and the trust of my friends and patients. So you needn't worry about leaving him without an office if you and Grandma decide to make the change. He'll be provided for. All he needs is a good wife; and I'm wondering . . ."

The doctor paused, turning to look at Charmian so intently that her color faded.

"There are photographs of two perfect pitchers on his bureau, and, according to Grandma, another in his watch!" she retorted lightly.

"And what is there in his heart, my dear?" asked the old man.

"How should I know?"

"Well," said the doctor, shaking his head, "if a red-blooded young fellow can live under the same roof with Charmian Davis, and not find something in his heart, I am at a loss. He should have been on his knees to her before this."

Charmian laughed as she responded: "I understand that they don't do it that way these days! And I've been told that a doctor's wife has a hard life."

"I think you could stand it," smiled her old friend. "I shouldn't want the lad to live alone, Charmian, as I have. He's a son to me."

She ventured a little laugh.

"I believe that I regard him that way myself! It's a pleasure to keep his meals hot, and to be grateful."

"To raise you should be grateful," said the doctor, smiling. "That is, unless—Dear me! Here we are at my destination. The widow Smithson has got the grippe, and I shan't be long, child."

The girl glanced up, suddenly conscious of her surroundings. They had stopped before the small, brown, shabby cottage where Jim Bennett had once collected interest money—the place where Charmian had called him "Skylock."

CHAPTER XIX.

As the doctor went within, Charmian's thoughts drifted back to that ride with Jim—till all the changes that had come since, and to those that were destined to come before many years. The old man's confidence had stirred her deeply. He was younger than her grandmother, but he had lived a harder life and was breaking earlier. Probably he knew more about his condition than he had told her. The end might be sooner than it seemed; and he was getting his house in order." It was like him to be ready when the call came; and to plan so that he care for her welfare went even beyond the grave.

Charmian shivered, not from cold, but from a sense of what life would be to her when all these natural changes had taken place. Even Grandma, happy as she was, could not go on forever. What would there be for her in Wickfield without Grandma, the old doctor, and even Jim? There was John Carter, to be sure. Perhaps . . .

The girl's lovely color deepened just a trifle at the thought of where their period was leading. Then a chill, painful cry from within the cottage brought her back to the scene before her. The house seemed even shabbier than she remembered—it cold and uncomfortable in its wintry setting. A broken windowpane was studded with an old shawl. The shades at the windows were torn and sagging. What would such people do without a kindly counselor like Doctor Howe? Would his successor be as lenient to unpaid bills or would he collect relentlessly, as Jim Bennett had collected that interest the bank?

No, Charmian's heart answered, John Carter would not be an inhuman creditor. There was a kindly smile on his face that reached such a thought. But he spoke up, smiling within her, and was kind also. Only in business . . . Did all business men care less about the human side of life? . . . Did days spent thinking in terms of money, blind one after a time to other needs?

She stirred as the door of the cottage opened and closed on her old friend; but he came to her side of the car and asked a question:

"Have you got Jim Bennett's address on the tip of your tongue, child? I can't remember it."

(To Be Continued.)

### Fought At Waterloo

How To Obtain Pension Under New British Pension Act

That the widow of a man who fought at the Battle of Waterloo will be among those to obtain a pension under the new British Widows' and Orphans' Pension Act was revealed by Arthur Greenwood, Minister of Health, in a speech at Hackney, Eng., last, recently. His husband, he said, was born in 1812, when he fought at Waterloo in 1815, and he did not marry until he was over 60, his wife being a young girl. This means, Greenwood continued, that her husband was born in 1817, in the days of George III, and among the events he would have had enough to recall the death of Nelson and the war with America.

**Neglect Of Good Books**

Is One Of Great Crimes Of Modern Society

Stanley Unwin, of the well-known firm of London publishers, George Allen and Unwin, is convinced that "there are scores of thousands of our supposedly educated fellow countrymen who never enter a bookshop or spend even half a crown per annum on the purchase of a book." And the same is no doubt true of Canada. And it is quite probable that this same crowd that doesn't buy books doesn't read them out of the libraries and read them. The neglect of good books is one of the great crimes of modern society.

**Milner's Worm Powders**

act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in use for many years and are recognized as a leading preparation for the purpose. They have proved their power innumerable times and have given relief to many children, who, but for the good offices of this compound, would have continued weak and enfeebled.

The girl glanced up, suddenly conscious of her surroundings. They had stopped before the small, brown, shabby cottage where Jim Bennett had once collected interest money—the place where Charmian had called him "Skylock."

Miner's for Insect Bites.

## Bigest Borrower and Biggest Lender

Report Issued From Geneva Will Be Surprise To Many

It might be thought that Germany, with all her reparations needs, is the biggest borrower, and that the biggest lender in the world is the United States with all its gold.

Well, this isn't so, on the capital basis, at any rate, according to a report just issued by the League of Nations Economic Section at Geneva. This volume, according to a New York Times dispatch, jars several widely accepted ideas. The figures cover the year 1928, and the Times writer summarizes in part:

The country lending the most abroad per capita was not the United States, but The Netherlands, which was followed by France and the United Kingdom.

The country borrowing the most abroad per capita was not Germany, but Australia, which was followed by Germany, Argentina, Norway, and Hungary. Germany was greatest in the amount borrowed, her total being \$1,067,000,000. Australia was second, with a total of \$267,000,000.

The heaviest annual interest payments abroad per capita are not by Europeans, the most heavily indebted of European nations paying only from \$2 to \$5 per capita, but by Australia, New Zealand, Canada, Argentine, and South Africa, the citizens of these sparsely settled countries paying from \$10 to \$30 respectively.

The greatest net receipt from interest and dividends was still recorded by the United Kingdom, with \$1,387,000,000 and \$833,000,000 respectively, in 1928.

The United States, far from being a laggard in her merchant marine, had the second greatest gross income from maritime freights. In 1928, the figures being for the United Kingdom \$657,000,000; for the United States, \$339,000,000; and for Germany, \$56,000,000, with Norway, Italy, and Sweden following.

Canada profits more from tourists than any country which is also really synonymous with tourism, Switzerland. The nations receiving the most from foreign tourists are, in order, France, Italy, Canada, and Switzerland—Literary Digest.

**A Good Argument**

Diner—"Waiter, is this chicken soup?"

Waiter—"Yes, sir."

"Waiter, I can't find any chicken in it."

"Well, really, sir, you wouldn't expect to find a horse in horse-radish, would you?"

\* \* \* Known Where To Go

Recently a woman from Dallas, Texas, arrived in New York to visit a friend. "I want to buy some cheap little trinkets to send back home for a joke," said the visitor. "Where is the Woolworth Building?"

The Chinese telephone exchange of San Francisco, Calif., has 2,300 subscribers; two of the operators have served for 20 years.

## WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mr. H. F. Sturz, of Philadelphia, wrote: "Two days ago we were all very bad, with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 35 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

### May Judge Perth Cattle

Kenneth McGregor, Manitoba, Receives Invitation From Scotland

Kenneth McGregor, son of the Lieutenant-Governor of Manitoba, native of Amherstberg, and cousin of Malcolm McGregor, has been invited to act as a judge at the cattle show at Perth, Scotland, in February. This is the greatest Aberdeen-Angus annual event of its kind in Scotland and no Canadian has ever before been asked to act as judge. Mr. McGregor is a famous breeder of the Aberdeen-Angus cattle.

### STURDY CHILDHOOD

The sturdy child—the bright, active little chap is the one everybody loves. It is only the sickly, fretful, ill-natured child that is the birthright of every child to be sturdy and well—to be able to make everyone admire him. Therefore, mothers, you must not blame your fault, he must be ailing and it is up to you to see that he gets relief—that he is given a medium with quickly make him well and keep him well."

Baby's Own Tablets are especially designed for infants and young children. They are not designed to correct the irregularities of the stomach and bowels—the cause of most of the ills of childhood, after birth. The tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### New Metal Alloy

Combines Lightness Of Aluminum With Hardness Of Steel

A new metal alloy which combines the lightness of aluminum with the hardness of steel has just been developed here by Johan Haerdern, a Stockholm engineer. The material can be rolled and forged and is impervious to all corroding water. In engineering and aviation circles in Sweden it is believed that the alloy will be of great benefit to aircraft manufacturers, especially in hydroplanes, on account of its resistance to salt water. Keep Douglas' Egyptian Liniment for burns, sprains, reflex bleed poison and sore corns. It relieves foot and muscular rheumatism and is valuable for inflammation and muscular rheumatism.

### Preference For Blacks

A sheep slayer that attacks only the black sheep in the flock is reported from Cheyenne, Wyoming. This freak killer went through a flock and killed seven black sheep in one night, but failed to touch a single white one.

### Little Helps For This Week

"The Lord shall be unto thee an everlasting light"—Isaiah ix. 19.

There is no day so dark But though the morn some ray of hope may come, Some blessed touch from Heaven that we might feel

If we but choose to mark.

Let us all be sure that all is well, whatever comes, while we trust and hope, we will grow stronger, and rightly wise— and rightly helpless—when we want what we are in no wise willing to earn. The glory and the glow of life come by right living. So then, while we may not know what trials that are in store for us, we can believe that as the days in which Job wrestled with his dark maladies are the only days that make him worth remembrance, and but for which his name had never been written in the Book of Life; so the days through which we struggle, finding no way, but never losing the light, will be the most significant we are called to live.—Robert Collier.

### Lead In Aeronautics

France Lays Claim To Holding Ninety Aviation Records

France is a country of birdmen. The International Aeronautical Federation controls officially 90 aviation records; and of these records, 38 of them are held by Frenchmen. Germans come next with 25 records, and Americans third, with 22. Italians hold eight records. English and Swiss birdmen hold three each. Czechoslovakians have one record. The five important world records are divided as follows: Distance in a straight line and in a closed circle, France; altitude, Germany; speed, England; duration, United States.—La Libre.

### Minard's for Falling Hair.

Again Break Record  
Homestead filings at the Edmonton land office have again shattered all records. During April 529 homesteads and 19 soldier grants were taken up. The preceding April exceeded any previous month with 349 homesteads and 8 soldier grants.

### CONSTIPATION COMPLETELY GONE\*

writes Mrs. W. Walker, Thomas and Sons, Inc., New York. "I had constipation and overeating. Took a dr. dose of Dr. Minard's Cough and Cold Cures twice daily. Now I am regular. Get Dr. Minard's Cough and Cold Cures.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

### WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

### Baseball Gossip

Crossfield winners of the Rose-  
bud League in 1929-30 are playing  
a good brand of ball. They have  
made five errors in the last four  
games, which gives you an idea  
of the kind of ball they are play-  
ing.

A good deal of credit for the  
showing the ball team is making  
must go to President "Happy"  
MacMillan and Manager Ever  
Bills. Both of these men have  
sacrificed a lot of their time and  
burned up a lot of gasoline in get-  
ting players to and from the  
games, etc.

To Knock the Calgary Dodgers  
over for three games in three  
days is not so bad.

Even fleet-foot Russ Gideon,  
the chocolate colored fielder of  
the Dodgers was thrown out on  
two attempts to steal second on  
Sunday. McKinley to Donnie  
McFadyen is bad medicine for  
these boys trying to steal.

Mr. A. Cruickshank handed  
Scotty Lee a five bill for his good  
work in defeating the Dodgers.

When I look at the donations  
that Adam Cauckishank has made  
to Ball Clubs, the Horseshoe Club  
the Churches, etc., I don't think  
he ever visited Scotland, let alone  
to be born there.

### Double-Header on Sunday

The Booster Baseball Team of  
Calgary will play a double header  
here on Sunday, July 6th at 3 p.m.  
and 5 p.m. The Boosters have  
a good club and this should be a  
good series.

### Dominion Day Picnic

About 500 Oddfellows, Rebekahs,  
their friends and children from  
Calgary, Airdrie, Didsbury  
and Crossfield enjoyed a most suc-  
cessful picnic at the fair grounds  
on Dominion Day. The big attrac-  
tion of the day was the "base-  
ball game between the Calgary  
Dodgers and Crossfield, when the  
local club again defeated the highly  
taught Amateur Champions of Alberta  
by a score of 3 runs to 2.

Calgary won the soft ball game  
from Airdrie by a score of 12 to 7.  
One of the most interesting fea-  
tures of the picnic was the men's  
tug of war, which was won by a  
team consisting of C. Richardson  
O. E. Jones, F. Purvis, Garret  
O'Neill, A. Drury and C. Smart.  
Equally keen was the contest be-  
tween the women's teams, which  
was won by the following five;  
Pearl Plumb, Mrs. V. Patmore,  
Mrs. Smart, Mrs. Adams and Miss  
Davis.

A good programme of races for  
boys and girls, from 7 to 9 years,  
up to the Men's 100 yard dash,  
were pulled off.  
The Rebekahs gave a dance in  
the U. F. A. hall at night, which  
was well attended and a good time  
was had.

### NOTICE

PUBLIC NOTICE is hereby given that  
the Canadian Pacific Railway did, on  
the 12th day of June, A. D. 1930, deposit  
in the Office of the Surveyor General as  
No. 1278 plan, profile and book  
of reference showing portion of prop-  
erly branch line from Crossfield North-  
westerly from a point in Section 29,  
Township 28, Range 1, West of the 5th  
Meridian to the north limit of Section  
8, Township 31, Range 3, west of the 6th  
Meridian, Province of Alberta, AS LO-  
CATED Mile 0.0 to Mile 36.19.  
Dated at Winnipeg,  
This 16th day of June, A.D. 1930  
P. McFHERSON,  
Right of Way and Tax Agent,  
Canadian Pacific Railway,  
Winnipeg, Manitoba

### Local and General

Ray Gilchrist spent Monday in  
Calgary.

Mrs. Jarman and Phyllis spent  
Wednesday in Calgary.

Mrs. Alex Fraser and family of  
Calgary, attended the Inverlea  
picnic on Wednesday.

Mrs. J. M. Williams and Grace  
spent Monday in Calgary.

Mr. and Mrs. N. A. Johnson  
spent the holiday in Calgary.

Constable Jarman of the A. P. P.  
is driving a new Dodge car.

Dr. and Mrs. Kelso of Edmonton  
spent the weekend visiting at the  
home of Mr. and Mrs. Wm. Laut.

Gordon and Laverne Johnson are  
spending the week visiting their  
grand-parents in Calgary.

Alex MacBeth of Winnipeg is  
visiting his father Alex MacBeth of  
the Pitt Construction Co.

Glen Williams left on Sunday to  
spend a two weeks holiday at Bent-  
ley and Jasper Park.

Mr. and Mrs. R. M. McCool at-  
tended the picnic at Beddington on  
Tuesday.

Mr. McCool is back on the job  
at post office, after a two weeks  
vacation.

Mr. and Mrs. A. H. Miller and  
son Lexy are leaving on Friday on  
a two weeks auto trip to California.

Mrs. Mossop and Elsie left on  
Thursday of this week to visit Mrs.  
Mossop's daughter Marjorie at Ok-  
otoks.

The Women's Guild will hold  
their weekly sewing circle at the  
home of Mrs. S. Jones on Thurs-  
day, July 10th at 3:30.

Mr. and Mrs. J. W. Place of Cal-  
gary, spent the holiday visiting  
at the home of Mr. and Mrs. H.  
Mobbs.

The Chronicle is anxious to get a  
full report of the examinations held  
in the several schools of the districts.  
Teachers are requested to forward  
their reports as soon as possible.

With July's future wheat cracked  
to 92 1-2c, lowest point since 1914;  
it seems to me that at high time the  
price of flour and bread took a big  
drop. The consumer and the far-  
mer is certainly getting stung.

Mr. and Mrs. Bannister attended  
the convention of the Electrical As-  
sociation held under canvas at Banff  
on Saturday, Sunday and Monday.  
Wm. Mucock was in charge of the  
radio shop during their absence.

Mr. Cormie, poultry commis-  
sioner of Alberta, will be here  
about the middle of July and is  
anxious to meet all those who are  
interested in forming a Poultry  
Association in the Crossfield dis-  
trict. Anyone interested can secure  
all the necessary information from  
Mr. F. Purvis.

Mr. and Mrs. T. Tredaway and  
daughters Winnie and Edna, re-  
turned home to-night after spending  
several days at Champion.

### With The Horseshoe Players

The second tournament of the  
Crossfield and District Horseshoe  
Club was held in the park on Sat-  
urday evening. There was a large  
turn-out of players and spectators.  
First prize was won by H. Fen-  
wick and S. Scott; second prize  
went to J. Aldred and A. McKen-  
zie, of the Bank of Commerce.

The following members partic-  
ipated in the tournament:

H. Fenwick, S. Scott, C. Havens,  
W. E. Bennett, J. Reeves, B. Lilley,  
D. McCrimmon, R. Nichol, A.  
Whillans, C. Aldred, J. Chalmers,  
R. M. McCool, H. Quinn, E. Landy-  
more, J. Aldred, A. McKenzie, J.  
McCool, F. Ruddy, W. McCrim-  
mon, M. Patmore.

The prizes for the tournament  
were donated by the U. F. A. Store,  
Wm. Laut, M. Thomas and Hugh  
McIntyre.

Everything is ready for the big  
tournament to be held in connection  
with the sports day on July 4th.  
Mr. Cruickshank has donated \$25  
for this event and at least 30 or  
40 pitchers in the district will par-  
ticipate.

The draw will be made at the  
fair grounds at 1:30 on Friday and  
every player in the district should  
be on hand.

A challenge trophy, donated by  
Mr. R. M. McCool has arrived and  
is now on display in the Chronicle  
window. This trophy was won by  
Aldred Bros. at the East Community  
on June 6th.

The secretary has received a  
challenge for this trophy and Aldred  
Bros. will defend it on Saturday,  
July 5th, at 7:30 p.m. at the park.

**Church of the Ascension**

Sunday School will not be held  
in the Anglican Church during the  
month of July.

No service on Sunday, July 6th.  
Sunday, July 13th at 11 a.m., Matins  
and Holy Communion.

Preacher, Rev. Canon Gale.

July 1st—Canada's National hol-  
iday—was fittingly observed by the  
I.O.O.F. picnic at the fair grounds.  
Last week we asked for a display  
of flags, and we are informed that  
the showing was far better than  
last year. Front street would of  
looked a whole lot better with a  
few more flags. We understand it  
was owing to the inability of  
would-be purchasers to procure  
flags from our local dealers, as  
there were several trying to pur-  
chase flags that we know of.

Mr. and Mrs. Monkman of Car-  
stairs, spent Monday in town looking  
after their house here and visiting  
their daughter Mrs. J. G. Gil-  
christ.

Mr. and Mrs. T. Tredaway and  
daughters Winnie and Edna, re-  
turned home to-night after spending  
several days at Champion.

General Manager

### THE MAGIC OF ELECTRICITY

We have absolutely nothing up  
our sleeves but behind us is a  
mighty army of workers and a  
great system of lines and power  
plants. By pressure of a button  
we will

Turn light into day.

Cook without fire.

Freeze without ice.

Change the weekly

wash into snowy

linen.

In other words, makes life easier,  
happier and lighter in a thou-  
sand different ways.

### CALGARY POWER COMPANY LTD.

EXTRA !

## BASEBALL

Sunday, July 6th.

Boosters, Calgary vs. Crossfield

at 3 and 5 p. m.
